

Lions Diabetes Awareness Foundation of MD-35, Inc.

## July 2010 Update

It is very important you get the consent forms returned to 2ndVDG Norma Callahan as soon as you finish your screening. We are in process of writing a report for Lions Clubs International Foundation. We are requesting that you not stockpile supplies. We are not getting as many strips at this time as the donations to the diabetic camp has been reduced. After mid-August when camp is done we will have a better idea on our need for consumable supplies as we may need to purchase strips. Please keep in mind not to waste or keep more than you need and if possible share when you can. We will be looking at Websites and companies to see what kind of pricing we can get. As it stands right now there is no problem with lancets. Enjoy your summer and keep safe.

Following is a list of permanent training sites with scheduled training dates. We will continue to fill in the gaps especially in the new District 35-L. Remember that you are always welcome to attend any class all we ask is that you sign up early enough so we will have plenty of manuals and food available to all attendees.

Homosassa - August 14, 2010

OTOW – October 16, 2010

Lions Camp – September 18, 2010
